## PROJECTS

### OS PROCESS SCHEDULING SOLVER | [LINK](#)

- A Web-application to solve process scheduling problems using **C++ & Wt (C++ Web Framework)**.

### WEB - EDITABLE PORTFOLIO BUILDER | [LINK](#)

- This is a portfolio template, where anyone can build their portfolio by *editing directly on the web*.
- Users can directly deploy their customized portfolio site, with just *one-click deployment feature* available on the site (deployment guide is there for non-technical users).
- Besides that users can also *export or migrate* the whole code of the portfolio.

### E - COMMERCE BOOK STORE (Group Project) | [LINK](#)

- A simple ECommerce Book Store website for ordering books, using **HTML, CSS, PHP, MySQL**.
- Although this type of website is available all over the internet. But during developing the website we have learned a lot, *mostly how to work in a team environment*.

### GAMES (Arkanoid, Tetris, Match the Gems, Asteroid) | [LINK](#)

- Developed different types of 2D Games with *High-Quality visuals and graphics* using **C++11 (Modern C++ features) & SFML (C++ Game Framework)**.
